EDUCATION

Toronto Metropolitan University

Bachelor of Engineering, Mechatronics Engineering | Expected graduation: 2030

TECHNICAL SKILLS

Programming	C, C++
Embedded systems	ESP32, Arduino, PlatformIO, ESP-NOW, PWM
Mechanical design	SolidWorks, CAD, engineering drawings
Hardware	Motor drivers, DC motors, circuit integration, prototyping

ENGINEERING PROJECT

Wireless ESP32 Robotic Vehicle

Personal project | 2026

- Built a wireless robotic vehicle and handheld controller using two ESP32 microcontrollers and ESP-NOW communication.
- Programmed directional controls in C/C++ and integrated an L298N driver with two DC motors.
- Tested the power and communication systems; troubleshoot voltage drops, microcontroller resets, and wireless connection issues.
- Used PlatformIO to develop, debug, and refine the embedded software through iterative testing.

WORK EXPERIENCE

Canada's Wonderland | Vaughan, ON

Culinary Area Supervisor

Apr 2023 – Present

- Advanced through five roles: Line Cook, Prep Cook, Culinary Lead, Culinary Supervisor, and Culinary Area Supervisor.
- Oversee daily operations across three food service units, coordinating staff and priorities during high-volume periods.
- Provide direction to team members, support training, and maintain safety, quality, and service procedures.
- Respond to operational issues across multiple locations and communicate with team members and management to keep service running.
